

Product Description

JDR halogen bulbs

The Todaybulb's JDR halogen bulbs are designed as spotlight with E14 or E27 socket, particularly suitable for general and accent lighting. The halogen JDR E27/E14 spotlight has a transparent protective cover, and a good quality ceramic for heat dissipation. They operate on main voltage 220~240V or 110~130V and don't need a transformer. This JDR E14 bulb is flicker-free and instant full brightness without pre-glow.

Advantage

- Excellent Color Rendering

The Todaybulb's halogen JDR E27/E14 spotlights offer high color rendering ($CRI \geq 99$), ensuring your objects appear vibrant and true without color distortion.

- Comfortable Light

JDR halogen bulbs provide a gentle 2700K warm white soft light, free from flicker or harsh glare. Creating your space with comfortable and warm lighting.

- Various wattages and brightness

Available in 35W, 50W, and 75W variants, this JDR E14 bulb gives you flexibility in brightness levels to match different lighting preferences and environments.

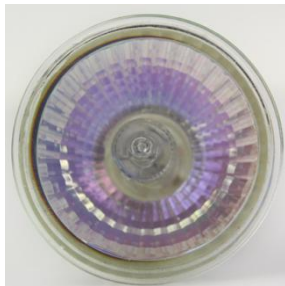

- Dimmable

The Todaybulb's JDR halogen bulbs are fully dimmable and compatible with leading-edge and trailing-edge dimmer systems, enabling precise 0–100% lumen output adjustment without flicker or buzzing.

- Easy installation

The JDR C E14 or E27 bulbs are designed for easy installation, making them perfect for a wide range of residential and commercial lighting applications.

JDR halogen bulbs

Crystal glass cover,
Light transmittance up to 99.8%.
