

Product Description

WIFI smart LED strip light

As an innovative product of modern home lighting, Todaybulb's smart WIFI LED strip lights achieve precise control of color temperature (2700K-6500K) and 16 million colors through programmable LED technology, supporting voice assistants, mobile apps, and scene mode linkage control. These smart WIFI LED strip lights' flexible and customization features, such as a 20 meter pressure drop free design, are suitable for various scenarios such as suspended ceilings and background walls. It also has flicker free eye protection function, providing users with practical and artistic intelligent lighting environment solutions from basic lighting to atmosphere creation.

Advantage

-WIFI connection

No need gateway, easy to connect in any time, wide coverage more than 100m.

- Diversified lighting effects

Supports free switching of color temperature between 2700K-6500K, suitable for daily lighting needs, RGB color transformation can present 16 million color changes, including dynamic flow and flowing effects

-Voice/APP or remote control

Todaybulb's LED WIFI strip lights IS compatible with platforms such as Google Assistant, Amazon Alexa, Home-kit, T-mall genie, supporting phone dimming, color adjustment, timing settings and so on. Can be both controlled by APP or 24key remote control.

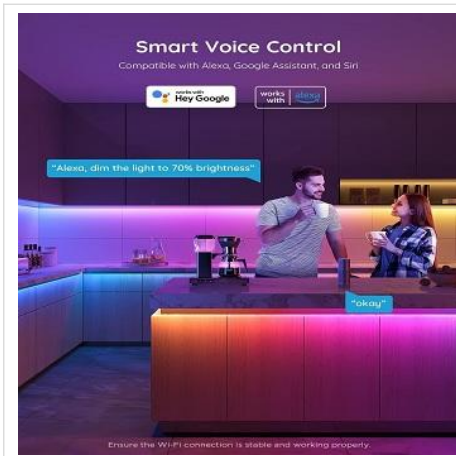

-Support long distance control

Utilize smart terminals (mobile phones/computers) or cloud platforms to achieve real-time control of devices across spatial limitations. For example, remote lights off when leaving home to save energy, pre-set lighting atmosphere before returning home.

-Low voltage safety kit

Full kit with integrate power supply(adapter), controller, and light strip to ensure stable power consumption

WIFI smart LED strip light

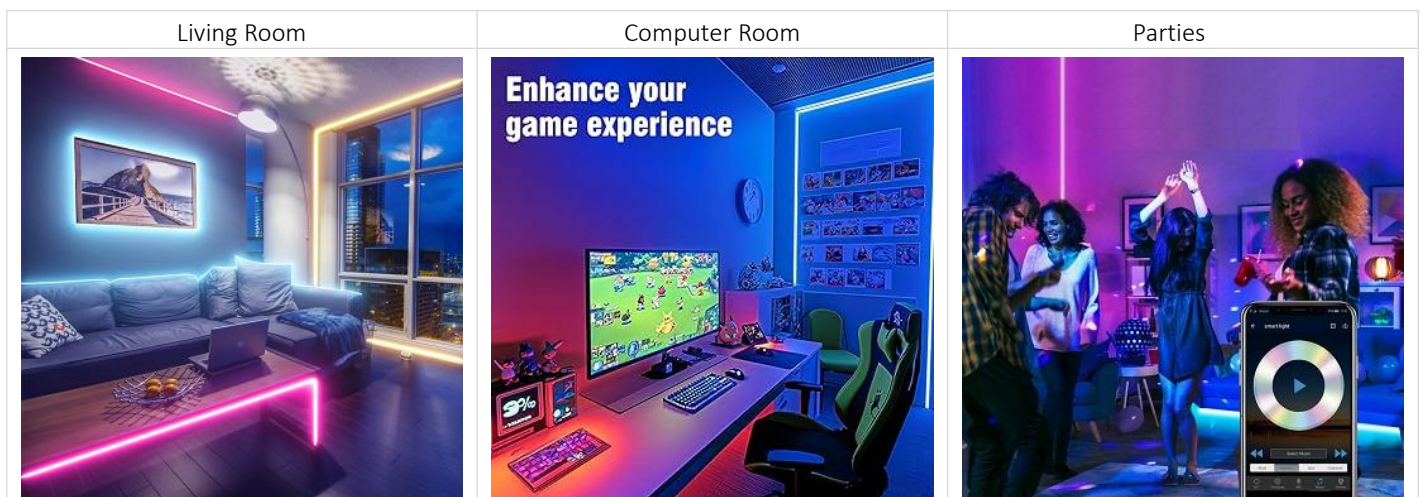

Feature

- ✓ Long service life 25000hours
- ✓ Cut-able and flexible
- ✓ UV- and IR-free light
- ✓ No flicker, eye protection
- ✓ IP65 waterproof
- ✓ Dimmable by APP or remote control
- ✓ 3M Tape on the back

Application

Todaybulb's WIFI smart LED strip, as the core component of modern smart homes, reshapes the spatial experience through wireless control and scene based lighting: in home scenes, WIFI smart LED strip 's16 million color RGB dimming and music rhythm functions can switch between "cinema mode" or "party atmosphere" with one click, combined with human body sensing to achieve contact less lighting; In the commercial field, LED WIFI strip lights is applied to dynamically attract traffic to store windows and create emotional dining environments in restaurants.

WIFI smart LED strip light

Specification

Model	LED / M	Watts / M	Color	Voltage	Size (mm)
5050-600	60	12	RGB	100-240V	10*10000 / 5000
5050-300	30	6	RGB	100-240V	10*10000 / 5000
